

Healthy Smiles Created Here

Every day. All day.

Your board certified orthodontist is a
specialist in perfecting smiles.

Your smile. Your children's smiles. Your neighbors'
smiles.

Orthodontists not only complete dental school, but
also an additional two to three years of an
American Dental Association accredited graduate
orthodontic program.

While completing a specialty program in
orthodontics, residents learn the best way to align
and move teeth into beautiful, healthy smiles.

Only those professionals who complete this
educational pathway may call themselves
orthodontists.

Only orthodontists who complete an American
Dental Association accredited orthodontic program
may continue on to become board certified by The
American Board of Orthodontics.

The American Board of
Orthodontics strives to elevate your
level of orthodontic care by
encouraging excellence in clinical
practice and specialty education.

completed the requirements
to become

BOARD CERTIFIED

by

The American Board of Orthodontics

The American Board of Orthodontics

The Examination Process

Board certification is based on the highest standards of orthodontic knowledge and clinical skill. To become board certified, orthodontists must complete a thorough written examination in all areas of the orthodontic specialty. During a comprehensive clinical examination, orthodontists present several finished patient cases for review by the expert examiners of The American Board of Orthodontics and complete an oral examination that evaluates diagnosis, treatment-planning, and finished treatment ability.

Your Orthodontist is Dedicated to Your Care

Your orthodontist is committed to you and your orthodontic treatment. Continuing education is a priority in order to provide the most up-to-date treatment.

Your orthodontist is board certified and has successfully completed the voluntary, rigorous examination process offered through The American Board of Orthodontics, the only orthodontic specialty board recognized by the American Dental Association and sponsored by the American Association of Orthodontists.

Through this accomplishment, your orthodontist has earned the title of Diplomate of The American Board of Orthodontics. This title is represented by the symbol below.

Share Your Smile

At the end of your orthodontic treatment, you will have a beautiful and healthy smile! You will see this gift mirrored on the faces of your friends and family. It's time to shine. Let the world see your smile.

A Lifelong Commitment Your orthodontist is committed to the lifelong board certification process. On a periodic basis, your orthodontist must take recertification examinations to maintain his or her board certification.

A current Diplomate listing can be found on the website below:
